

## Inform, Analyze, Empower

The **Makana 360 Daily Monitor Report** aims to provide timely and insightful updates on the most significant global news and top events, offering a concise overview of key developments that impact businesses, politics, and society. By curating and analyzing major trends, the report enhances awareness, facilitates informed decision-making, and supports strategic planning for our audience.

### Israel mulls West Bank annexation in response to moves to recognise Palestine

Israel is reportedly weighing annexation of parts of the West Bank in response to several countries recognizing a Palestinian state. The move, still undefined in scope, would likely target settlements or strategic areas like the Jordan Valley. It risks Palestinian backlash, international condemnation, and heightened regional tensions, while complicating Israel's ties with the U.S. and potentially undermining previous diplomatic agreements.

### Israel is committing genocide in Gaza, says scholars' association

The International Association of Genocide Scholars declared Israel's actions in Gaza as meeting the legal definition of genocide, citing tens of thousands of deaths and widespread destruction since October 2023. This increases global scrutiny, may influence international pressure and legal action, and could affect Israel's diplomatic standing and legitimacy in the long term.

### Trump says he will order voter ID requirement for every vote

Trump announced plans for an executive order requiring voter ID for all ballots and limiting mail-in voting, reflecting his push to control U.S. elections ahead of the 2026 midterms. The move may favor Republicans but faces legal and state-level challenges, likely fueling partisan disputes and polarization.
